

Uploading a New Logo & Favicon

Menu Access: Stores > Configuration > EMC > Theme Modifications > Header

Your website comes with a standard logo and favicon. We strongly suggest getting a store logo that is unique to your website. To upload your custom store logo and favicon:

1. Click “Stores” on the main menu bar
2. Then select “Configuration.” Then Select EMC and click Theme modifications from drop down.
3. Now you can select “Header” and choose the file for both your favicon and main logo image!

NOTE : Make sure to click SAVE CONFIG to save logo and favicon changes
